I have a 2006 expedition with 136,000 miles and have had the transmission checked and replaced the coil wires but it still misses at 40-50 MPH and at 70 mph does the same sound. If you accelerate and back off the go again it sounds like the transmission is clunking but the transmission guy said it wasn't the transmission.

Transmission slipping 2006 ford expedition - Fixya

Tl- the contact owns a 2006 Ford Expedition. The contact stated that while driving 40 mph, the transmission slipped. The vehicle was taken to an independent mechanic for inspection and they stated that the transmission needed to be replaced. The vehicle was not repaired. The manufacturer was notified. Transmission Slip In Overdrive With Valve Body Cleaning ...

"Slipping" is the sensation that your transmission isn't connected to your engine when you press the accelerator. This happens in manual transmission vehicles when the clutch wears out and loses grip intermittently. The F-150's transmission has been automatic only since 2004, but "slipping" still happens for a number of reasons.

Ford F-150: Why is My Transmission Slipping? | Ford-trucks

2006 Ford Explorer automatic transmission that slips and causes a jolt when it downshifts, feels like one is being rear ended. Additionally there is a weird sound as this happens. Ford has unsuccessfully tried to reprogram the car. Took the car back for the Ford mechanic to look at and was told there is nothing he can do.

Transmission Gear Slipping Problems of the 2006 Ford Explorer

The operation of the transmission is controlled by the powertrain control module. Many input sensors provide information to the powertrain control module. The powertrain control module then controls actuators which determine transmission operation. The transmission control switch (TCS) is a momentary contact switch.

How to Diagnose a Ford Expedition Transmission Problem

my 2006 exp 5.4 pt4wd transmission "stutters or chatters" when slightly accelerating between 40-45 mph to go "a little faster" Seems to do the same thing between 50-55 mph when trying to slightly speed up. If you accelerator more vigoursly, it downshifts fine and has no problems.
