"Help students understand why financial markets exist, how financial institutions serve these markets, and what services those institutions offer with the solid conceptual framework in this best-selling finance text. Madura's leading "Financial Institutions and Markets, 10/e, International Edition" emphasizes securities traded by financial institutions and the scope of participation of those financial institutions within each market. This edition also focuses on the management, performance, and regulatory aspects of financial institutions and explores the functions of the Federal Reserve System, the major debt and equity security markets, and derivative security market. This edition places significant emphasis on current financial reform as updates throughout reflect the most recent financial changes, developments and trends in today's financial industry. Known for a solid, reader-friendly approach, author Jeff Madura blends a clear writing and contemporary coverage with hands-on learning applications such as Point/Counterpoint, "Using the Wall Street Journal", and new online research assignments. Timely examples further connect concepts to today's developments and financial trends. Each new copy of this edition includes a discount for Stock-Trak Global Portfolio Simulations Gold Service, the online trading simulation created specifically for classrooms worldwide that enables students to buy and sell stocks, bonds, mutual funds, options, future options, and more using hypothetical brokerage accounts"--Amazon.com.

Volume II of this book grew out of the author's work as an economist for the U.S. Congress on the staff of the House Banking Committee under Chairman Wright Patman and his successor, Chairman Henry Reuss; as an analyst for the Congressional Budget Office; and as finance economist for the House Energy and Commerce Subcommittee on Telecommunications, Consumer Protection and Finance. It is a re-examination of the validity of traditional concerns in order to establish the Context for congressional actions to modify the existing regulatory and structural framework.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at [www.worldbank.org/globalfindex](http://www.worldbank.org/globalfindex).

This book is about the roles that financial institutions are expected to play for revitalizing regional economies in Japan, which face several serious problems such as a rapidly aging population as well as a sharp decline in population. The Japanese government expects regional financial institutions to contribute to that revitalization. Actually, Japanese regional financial institutions have made various efforts to support small and medium-sized enterprises (SMEs) to increase their profitability and sustainability. However, the efforts have not yet produced adequate outcomes. To help clarify the reasons for the failures and to offer policy recommendations, the authors used four questionnaires to conduct surveys. They sent the questionnaires to the headquarters of regional financial institutions for Chapter 1 and to the staffs of regional financial institutions for Chapter 2. The government revised the Credit Guarantee System Reform Act in 2017 to promote financial institutions and credit guarantee corporations in order to proactively support SMEs, so in Chapter 3 the aims of the revised act are explained. Chapter 4 is based on a survey of startups that used the public credit guarantee. Finally, Chapter 5 is based on another, different questionnaire that was sent to SMEs to find out why they failed to improve their risk management and how financial institutions can help them to prepare for disasters. To the best of the authors' knowledge, these questionnaire studies on regional revitalization have not been carried out elsewhere, making this book unique.
