~~This book begins with a lesson on the nature of astronomy, and then it covers the major structures of our solar system. Starting with the sun and working towards Pluto, the student will learn details about all nine planets (or is it eight? - your student will have to decide) in the solar system. Along the way, the student will also learn about Earth's moon, the asteroid belt, and the Kuiper belt. After that, the student will move outside our solar system and learn about the stars and galaxies that make up God's incredible universe. Finally, the student will learn about space travel and what it takes to be an astronaut! The activities and projects use easy-to-find household items and truly make the lessons come alive! They include making a solar eclipse, simulating the use of radar to determine a hidden landscape, and making a telescope. We recommend that you spend the entire school year covering this book, devoting approximately two sessions per week to the course.~~

~~This is the best-selling one-volume Bible dictionary. More than 5,000 entries include discussions of historical, geographical, chronological, and biographical aspects of the Bible, as well as articles on theological subjects; more than 700 pictures are included as well.~~

~~The publication of the King James version of the Bible, translated between 1603 and 1611, coincided with an extraordinary flowering of English literature and is universally acknowledged as the greatest influence on English-language literature in history. Now, world-class literary writers introduce the book of the King James Bible in a series of beautifully designed, small-format volumes. The introducers' passionate, provocative, and personal engagements with the spirituality and the language of the text make the Bible come alive as a stunning work of literature and remind us of its overwhelming contemporary relevance.~~

~~Richmond Lattimore, one of the most distinguished living translators of Greek, has in this book completed his rendering of the New Testament in fresh and accurate English for the modern reader. The publication of his translation of The Four Gospels and the Revelation in 1979 was hailed by the New York Times Book Review as "an achievement that places us more deeply in Lattimore's debt than any other in a long diligent career." The Acts of the Apostles, which he calls "the earliest consecutive story of early Christianity that we have," and the three groups of Letters of the Apostles--those of Saint Paul, the letter to the Hebrews, and the General Letters--are now made available to complete the New Testament in his translation. His aim again has been to provide a simple, literal rendering in which the syntax and order of the Greek dictate the character of the English style. Lattimore, as an authority on the Greek language in which these texts have come down to us, and as a writer without pretensions as a biblical scholar, allows the words of the apostles and earliest disciples to speak for themselves with accuracy and fidelity to the Greek. The book's design follows the attractive and readable format of The Four Gospels, and avoids the usual apparatus of biblical texts.~~
