Diagnostic Trouble Codes Fault Locations And Probable ...

Diagnostic Trouble Codes (DTC) are the codes generated and stored by the Powertrain Control Module (PCM) when the Onboard Diagnostic (OBD) system indicates a malfunction. Simply put, when your car system diagnoses that something went wrong, it will send a code indicating the specific fault.

OBD2 Codes: Complete Guide of Diagnostic Trouble Codes(DTC)

Each code corresponds to a fault detected in the car. When the vehicle detects an issue, it will activate the corresponding trouble code. A vehicle stores the trouble code in it's memory when it detects a component or system that's not operating within acceptable limits. The code will help you to identify and fix the issue within the car. Each trouble code consists of one letter and four digits, such as P1234.
