Drilling Manual - Our site is a platform to provide assistance to build your knowledge about drilling oilfield. The contents are presented in easy way in order to make learning from this website an easy job.

Drilling Manual - Our site is a platform to provide ...

During operations on a drilling or producing well, a sequence of events may require tubing, casing, or drill pipe to be run or pulled while annular pressure is contained by blowout preventers; such practice is called " stripping ". Stripping is normally considered an emergency procedure to maintain well control; however, plans for certain drilling, completion, or well work operations may include stripping to eliminate the necessity of loading the well with fluid.

STRIPPING OPERATIONS - Drilling Manual

General Drilling Operations. THE DRILLING PROCESS. After a workpiece is laid out and properly mounted, the drilling process can begin. The drilling process, or complete operation, involves selecting the proper twist drill or cutter for the job, properly installing the drill into the machine spindle, setting the speed and feed, starting the hole on center, and drilling the hole to specifications within the prescribed tolerance.

Drilling operation: When we need a circular hole in a workpiece of any size there, we can use drilling operation, by a drilling operation you can form any size of holes in a workpiece. Although you can use a lathe for drilling operation too, drill machine is an appropriate machine to do holes in a workpiece. The cutting tool we used for this type of operation is drill bit. A drill bit is a multipoint rotary cutting tool which helps to remove material from a workpiece.

Level 2 NVQ in Land Drilling Operations - Land Driller This NVQ is eligible for a CITB qualification grant. The qualification structure below specifies the combination of units that need to be achieved for the individual to be awarded the qualification, so you can work as a competent land driller within the construction industry.

Level 2 NVQ in Land Drilling Operations - Land Driller ...

Drilling is the operation of producing a cylindrical hole by removing metal from the rotating edge of a cutting tool called the drill. The drilling is one of the simplest methods of producing a hole. Before drilling the centre of the hole is located on the workpiece by drawing two lines at right angles to each other and then a centre punch is used to produce an indentation at the centre.
