The book is built around a core of treatment interventions that were published in several well-known journals on substance abuse treatment and research in social work practice. In addition, the editors will provide a bridge analysis across chapters and sections connecting key themes across chapters, and they will provide a discussion in each chapter that describes why the intervention was chosen, it's significance and why it is believed to be noteworthy. In addition, each chapter will contain critical thinking questions and the book will contain a glossary of key terms.
