development of learner capabilities, teaching approaches, and institutional strategies in higher education, to foster lifelong graduate employability through social connectedness.

This book explores a noteworthy variety among economically advanced countries in the competences fostered by higher education, and the emphasis placed either on laying a broad basis of knowledge or direct preparation for professional tasks. In some countries, universities are closely involved in ensuring a rapid transition from student to employee; in others, students typically face a long period after graduation for the search of a suitable career.

Employability practical models through an exploration of how universities around the world are using innovative techniques to enhance employability.

This book addresses the issue of graduate employability (GE) within the changing context of contemporary Vietnam. GE has become a highly topical and contested issue in Vietnam. Employers report that university students are not suitably prepared for work, and universities are often criticised for their poor commitment to developing student employability assets. However, it is suggested that enhancing GE in Vietnam involves many factors that are often underplayed in the general

# Read Free Higher Education And Graduate

**Employability** literature. In the Vietnamese context, both the education system and the economy remain relatively underdeveloped; students are schooled to be passive learners; and corrupt employment practices remain rife. Moreover, Confucian cultural features of face saving, hierarchical order in decision making, and the role of rumour and hearsay in a collectivist culture each play an important part in the different ways university graduates negotiate their transition to employment. Thus, in order to enhance the development of GE in Vietnam, all related stakeholders need opportunities to collaborate so that a mutual understanding of the problem is arrived at and

Employability solutions are developed and implemented.

This book discusses the topic of graduate employability from the premise that in this era of 'massification,' economic austerity, and political uncertainties, higher education (HE) no longer guarantees a clear 'work place advantage.' Divided into three sections, the book offers theoretical and philosophical discourses on the 'HE quandary,' whilst taking into account – and critiquing - political, temporal, and national contexts. It culminates in an investigation into specific discipline areas. It offers insights into the way that institutions, decision-makers, academics, and professional

Employability support staff can work together towards ensuring that our graduates are able to cope with the varied demands and challenges of modern job markets. It harnesses arguments and reflections on the breadth and depth of the functions of HE, such as social transformation, promoting principles of social justice, and providing opportunities. It grounds these in a triadic model for enhancing student engagement and holistic learning, namely, the emotional, cognitive, and behavioural aspects. As an anthology, it is forward-gazing in terms of the sustainability debate, whilst still offering evidence-based, research-grounded, practical suggestions to readers looking for tips and

This book explores the highly significant and contested area of graduate employability and employment which is paid so much attention by those in the media and policy-makers. This is driven largely by concerns over the wider economic impact and value of graduates as increasing numbers complete their studies in higher education. At a time when graduates are seen as key to economic success, the critical question remains as to how their employability plays out in a changing labour market. This book brings together innovative approaches and research to present an extensive survey of the field. It provides insight on

Employability  
What is a complex and often elusive social and economic problem, ranging from how graduate employability is constructed as an economic and policy agenda to explorations of how graduates manage the transition from higher education to paid employment and finally to suggest future directions for curricula, policy and research.

Anyone with a responsibility for curriculum development or policy making within higher education who wants to advance learning and promote employability amongst their students will find this book absolutely essential reading.

Graduate employability is a

# Read Free Higher Education And Graduate

Employability  
significant concern for most higher education institutions worldwide. During the last two decades, universities have attempted to implement their employability agendas to support their students to enhance employment outcomes. However, within today's globalized labour markets, employability has gone far beyond the notion of obtaining stable and permanent employment. This book explores graduates' experiences in developing and utilizing employability capitals for career development and success in different labour markets. In the chapters, the graduate contributors narrate and discuss how they negotiated their employability on the transitions

# Read Free Higher Education And Graduate

**Employability**  
across jobs, occupational sectors and labour markets. The chapters address key issues, including how employability is understood by graduates of different disciplines, at different career stages and in different contexts; how they develop and utilise such capitals along with strategies to negotiate their employability; and what can be done to move the higher education employability agenda forward. The book presents international insights and perspectives into transitions from education to work and career development across the labour markets, as well as calls for improving the graduate employability agenda. It is an invaluable resource for researchers and academics,

Employability, university leaders, policymakers and students who are concerned about graduate employability.

The book makes a significant contribution to critical higher education studies, specifically to graduate employability research and to capabilities and education research. The book moves beyond the simplistic conception of alleged 'gaps' in graduate skills and 'mismatches' between employers and universities, and instead provides an innovative multi-dimensional and intersectional human capabilities conceptualisation of graduate employability. The book challenges an individualised notion of employability, instead locating employability issues in

**Employability**  
social and economic conditions, and argues that employability choices cannot be divorced from inequality. Qualitative and quantitative data from multiple case-study universities in South Africa are used to explore the perceptions and experiences of diverse students, lecturers, support officers and employers, regarding what each university is doing, or should be doing, to enhance graduate economic opportunities and contribute to inclusive development. The book will be highly relevant to students, scholars and researchers in the fields of education and sociology, particularly those with an interest in graduate employability.
