`This book is a useful addition to any staff library. What makes it different to many other similar books is that it shows teachers that speaking, listening and reading create the foundations for writing. Tested in schools, staff said: "It is a very useful framework for action-research based upon secure theory. When deciding classroom strategies, it is easy to find what you are looking for and the chapter summaries are very helpful. Some of the staff development and training suggestions are very practical and we are trying them out. We found the emphasis upon class novels and the class discussion that follows, very important, especially when linked to the excellent examples of children's writing." This book may appear to some as theoretical and 'academic', but this is why it will be valuable. It does what the title says because it shows how children learn to write. It starts at the beginning and saves diving into the latest trend. Perhaps its best recommendation is that every school that was asked to look at it said, 'It's good and we have ordered a copy' - John Lilly, independent education consultant 'The chapter on the Taxonomy of Writing Purposes will be useful for planning and those on extending and enhancing writing will definitely be helpful in many day-to-day situations' - Nicholas Bielby, Times Educational Supplement This book outlines the processes which are involved when children learn to write. The author shows how certain strategies can improve children's progress in writing. Dealing with the age range three to 13, the book addresses issues to do with: - the gender gap - children with English as an additional language - left-handedness Dorothy Latham includes ideas for sound and easy ongoing assessment of writing. The book is written in line with the requirements of the English National Curriculum and The National Literacy Strategy Framework for England, but is not limited to them. Topics also covered include: - brain development and structures - the acquisition of speech - language and thinking - working memory -

Sixteen year old Jules Blaze, heir of a Keeper, suspects his family hides a forgotten secret. It's bad enough that his people, the Elfies of Reign, triggered a curse which reduced the entire inhabitants to a mere inch centuries ago. All because of one Keeper who failed his purpose. Even the King's Books, penned with the Majesty's own blood, did not help ward off this anathema. Now, Gehzurolle, the evil lord, and his armies of Scorpents, seem bent on destroying Jules and his family. Why? Gehzurolle's agents hunt for Jules as he journeys into enemy land to find the truth. Truth that could save him and his family, and possibly even reverse the age-long curse. Provided Jules doesn't get himself killed first.

Stark is a secret consortium with more money than God, and the social conscience of a dog on a croquet lawn. What's more, it knows the Earth is dying. Deep in Western Australia where the Aboriginals used to milk the trees, a planet-sized plot is taking shape. Some green freaks pick up the scent: a pommie poseur; a brain-fried Vietnam vet; Aboriginals who have lost their land...not much against a conspiracy that controls society. But EcoAction isn't in society: it just lives in the same place, along with the cockroaches. If you're facing the richest and most disgusting scheme in history, you have to do more than stick up two fingers and say 'peace'.
