The acquisition of language is one of the most remarkable human achievements. When language acquisition fails to occur as expected, the impact can be far-reaching, affecting all aspects of the child ' s life and the child ' s family. Thus, research into the nature, causes, and remediation of children ' s language disorders provides important insights into the nature of language acquisition and its underlying bases and leads to innovative clinical approaches to these disorders. This second edition of the Handbook of Child Language Disorders brings together a distinguished group of clinical and academic researchers who present novel perspectives on researching the nature of language disorders in children. The handbook is divided into five sections: Typology; Bases; Language Contexts; Deficits, Assessment, and Intervention; and Research Methods. Topics addressed include autism, specific language impairment, dyslexia, hearing impairment, and genetic syndromes and their deficits, along with introductions to genetics, speech production and perception, neurobiology, linguistics, cognitive science, and research methods. With its global context, this handbook also includes studies concerning children acquiring more than one language and variations within and across languages. Thoroughly revised, this edition offers state-of-the-art information in child language disorders together in a single volume for advanced undergraduate students and graduate students. It will also serve as a valuable resource for researchers and practitioners in speech-language pathology, audiology, special education, and neuropsychology, as well as for individuals interested in any aspect of language acquisition and its disorders.

Studies of Japanese syntax have played a central role in the long history of Japanese linguistics spanning more than 250 years in Japan and abroad. More recently, Japanese has been among the languages most intensely studied within modern linguistic theories such as Generative Grammar and Cognitive/Functional Linguistics over the past fifty years. This volume presents a comprehensive survey of Japanese syntax from these three research strands, namely studies based on the traditional research methods developed in Japan, those from broader functional perspectives, and those couched in the generative linguistics framework. The twenty-four studies contained in this volume are characterized by a detailed analysis of a grammatical phenomenon with broader implications to general linguistics, making the volume attractive to both specialists of Japanese and those interested in learning about the impact of Japanese syntax to the general study of language. Each chapter is authored by a leading authority on the topic. Broad issues covered include sentence types (declarative, imperative, etc.) and their interactions with grammatical verbal categories (modality, polarity, politeness, etc.), grammatical relations (topic, subject, etc.), transitivity, nominalizations, grammaticalization, word order (subject, scrambling, numeral quantifier, configurationality), case marking (ga/no conversion, morphology and syntax), modification (adjectives, relative clause), and structure and interpretation (modality, negation, prosody, ellipsis). Chapter titles Introduction Chapter 1. Basic structures of sentences and grammatical categories, Yoshio Nitta, Kansai University of Foreign Studies Chapter 2: Transitivity, Wesley Jacobsen, Harvard University Chapter 3: Topic and subject, Takashi Masuoka, Kobe City University of Foreign Studies Chapter 4: Toritate: Focusing and defocusing of words, phrases, and clauses, Hisashi Noda, National Institute for Japanese Language and Linguistics Chapter 5: The layered structure of the sentence, Isao Iori, Hitotsubashi University Chapter 6. Functional syntax, Ken-Ichi Takami, Gakushuin University; and Susumu Kuno, Harvard University Chapter 7: Locative alternation, Seizi Iwata, Osaka City University Chapter 8: Nominalizations, Masayoshi Shibatani, Rice University Chapter 9: The morphosyntax of grammaticalization, Heiko Narrog, Tohoku University Chapter 10: Modality, Nobuko Hasegawa, Kanda University of International Studies Chapter 11: The passive voice, Tomoko Ishizuka, Tama University Chapter 12: Case marking, Hideki Kishimoto, Kobe University Chapter 13: Interfacing syntax with sounds and meanings, Yoshihisa Kitagawa, Indiana University Chapter 14: Subject, Masatoshi Koizumi, Tohoku University Chapter 15: Numeral quantifiers, Shigeru Miyagawa, MIT Chapter 16: Relative clauses, Yoichi Miyamoto, Osaka University Chapter 17: Expressions that contain negation, Nobuaki Nishioka, Kyushu University Chapter 18: Ga/No conversion, Masao Ochi, Osaka University Chapter 19: Ellipsis, Mamoru Saito, Nanzan University Chapter 20: Syntax and argument structure, Natsuko Tsujimura, Indiana University Chapter 21: Attributive modification, Akira Watanabe, University of Tokyo

Chapter 22: Scrambling, Noriko Yoshimura, Shizuoka Prefectural University
