Rated 5 out of 5 by prospector michael from Great washer and dryer! I bought my Centennial Washer and Dryer in 2013 and both are still going strong. I have had no issues with either and wash about 6 loads a week. Not sure about all the negative reviews unless the quality of manufacturing has changed since I bought my machines.

WE BOUGHT A MAYTAG TOP LOAD CENTENNIAL WASHER JULY OF 2011. WE HAVE HAD NOTHING BUT PROBLEMS SINCE COMING IN THE DOOR. IT WAS PURCHASED AT HARRINGTON APPLIANCE IN HARRINGTON DELAWARE. THE FIRST THING WE NOTICED IS THAT THE CLOTHES WERE NOT GETTING CLEAN AND A CYCLE TAKES AN ABSURDLY LONG TIME.

**Maytag Centennial complaint - TOP LOAD WASHER**

Centennial Washer Balance Problems: The Maytag Centennial washer's tub is suspended on 4 suspension rods located on the outer corners of the washer's tub. The spring portion of these tub suspension rods have been known to become soft and allow the tub to bounce, leading to the washer regularly going off balance and banging the inside of the washer during spin.

**Troubleshooting Common Maytag Centennial Washer Problems**

washing machine settings explained
The Normal cycle is a go-to for day-to-day loads. But when different stains and fabric types pile up in the laundry basket, get the most out of your machine with cycles that go beyond the norm.

**Washing Machine Settings Explained | Maytag**

This new style washer makes many different noises. Typically, a grinding or rubbing noise will only occur in the agitation/wash or spin portions of the cycle. The drive system on these units is different than previous washers. You may hear the motor sound as the motor alternates directions along with some gear sounds.

Maytag manufactures many different appliances, including refrigerators, dishwashers, washers and dryers. Maytag washers are either front-loading or top-loading. If your Maytag top-loader is not working properly you may need to open the cover to access internal components. You should never open the washing machine unless you have experience with washing machine repair.

This washer has sensors that detect the water supply and requires both hoses to have water going to the water valve. If it does not recognize both water supply hoses are turned on, the control detects a problem with the water pressure sensor. The lid will lock, and the machine will enter a pump out mode for 8 minutes.
