Project cycle management (PCM) is a project management approach that addresses the complexities of a project through all of its phases, while maintaining alignment with the strategy and objectives agreed upon by stakeholders at the onset. PCM helps with structuring and determining the phases of the project, how those phases look and how to approach tasks in those phases.

Clearly defined coordination, management and financing arrangements. A monitoring system to oversee and follow implementation and to support project management. The Project Cycle Management (PCM) represents the whole of management activities and decision-making procedures used during the life cycle of a project.

Managing a project | International Cooperation and Development

European Commission's Project Cycle Management Guidelines (2004) In 1992 the European Commission adopted "Project Cycle Management" (PCM) as its primary set of project design and management tools (based on the Logical Framework Approach), and a first PCM manual was produced in 1993. The manual was subsequently updated in 2001, shortly after the publication of the EC's most recent Development Policy document (April 2000).
