The billionaire space race is the intense rivalry in NewSpace by recent space entrepreneurs, who entered the space industry as billionaires from other industries, particularly computing. This private industry space race of the 21st century involves sending rockets to the ionosphere, orbital launch rockets, and suborbital tourist spaceflights. Amongst the billionaires entering into NewSpace are: South-African-Canadian-American billionaire Elon Musk, behind SpaceX and a project to colonize Mars. A

The historic quest to rekindle the human exploration and colonization of space led by two rivals and their vast fortunes, egos, and visions of space as the next entrepreneurial frontier *The Space Barons* is the story of a group of billionaire entrepreneurs who are pouring their fortunes into the epic resurrection of the American space program. Nearly a half-century after Neil Armstrong walked on the moon, these Space Barons—most notably Elon Musk and Jeff Bezos, along with Richard Branson and Paul Allen—are using Silicon Valley-style innovation to

dramatically lower the cost of space travel, and send humans even further than NASA has gone. These entrepreneurs have founded some of the biggest brands in the world—Amazon, Microsoft, Virgin, Tesla, PayPal—and upended industry after industry. Now they are pursuing the biggest disruption of all: space. Based on years of reporting and exclusive interviews with all four billionaires, this authoritative account is a dramatic tale of risk and high adventure, the birth of a new Space Age, fueled by some of the world's richest men as they struggle to end governments' monopoly on the cosmos. *The Space Barons* is also a story of rivalry—hard-charging startups warring with established contractors, and the personal clashes of the leaders of this new space movement, particularly Musk and Bezos, as they aim for the moon and Mars and beyond.

A Washington Post Notable Book This

New York Times bestseller is a

“ masterful ” (The Washington Post),
“ juicy tour of the company [Jeff] Bezos built ” (The New York Times Book Review), revealing the most important business story of our time by the bestselling author of The Everything Store. Almost ten years ago, Bloomberg journalist Brad Stone captured the rise of Amazon in his bestseller The Everything Store. Since then, Amazon has expanded exponentially, inventing novel products like Alexa and disrupting countless industries, while its workforce has quintupled in size and its valuation has soared to nearly two trillion dollars. It ’ s almost impossible to go a day without encountering the impact of Jeff Bezos ’ s Amazon, between services like Whole Foods, Prime Video, and Amazon ’ s cloud computing unit, AWS, plus

Read Online Rocket Billionaires Elon Musk Jeff Bezos 's ownership of The Washington Post. We live in a world run, supplied, and controlled by Amazon and its iconoclast founder. In Amazon Unbound, Brad Stone presents an “ excellent ” (The New York Times), deeply reported, vividly drawn portrait of how a retail upstart became one of the most powerful and feared entities in the global economy. Stone also probes the evolution of Bezos himself—who started as a geeky technologist totally devoted to building Amazon, but who transformed to become a fit, disciplined billionaire with global ambitions, who ruled Amazon with an iron fist, even as he found his personal life splashed over the tabloids. Definitive, timely, and “ engaging ” (Jon Meacham, author of The Soul of America), Stone has provided an unvarnished portrait of a man and company that we couldn ’ t imagine modern life without.

It ' s the 21st-century and everything about the space industry is changing, and leading that charge are private sector companies including Elon Musk ' s SpaceX and Jeff Bezos ' s Blue Origin, which are building a dizzying array of new spacecraft and rockets, not just for government use, but for any paying customer. At the heart of this space revolution are spaceports, the center and literal launching pads of spaceflight. Spaceports cost hundreds of millions of dollars, face extreme competition, and host operations that do not tolerate failures—which can often be fatal. Aerospace journalist Joe Pappalardo has witnessed space rocket launches around the world, from the jungle of French Guiana to the coastline of California. In his comprehensive work Spaceport Earth, Pappalardo describes the

rise of private companies and how they are reshaping the way the world is using space for industry and science. Spaceport Earth is a travelogue through modern space history as it is being made, offering space enthusiasts, futurists, and technology buffs a close perspective of rockets and launch sites, and chronicling the stories of industrial titans, engineers, government officials, billionaires, schemers, and politicians who are redefining what it means for humans to be a spacefaring species.

In alternating chapters of fiction and nonfiction, Huber turns the computer against Orwell's words, reimagining Orwell's 1984 from the computer's point of view, interpolating Huger's own explanations and arguments.

This book offers an original critique of the

companies, addressing their collective power, influence, and ideology, their group dynamics, and the role they play in the wider sociocultural and political formations of digital capitalism.

Interrogating not only the founders' political and economic ambitions, but also how their corporations are omnipresent in our everyday lives, the authors provide robust evidence that a specific kind of patriarchal power has emerged as digital capitalism's mode of command. The 'New Patriarchs' examined over the course of the book include: Sergey Brin and Larry Page of Google, Elon Musk of Tesla, Jeff Bezos of Amazon, Mark Zuckerberg of Facebook, and Peter Thiel. We also include Sheryl Sandberg. The book analyses how these (mostly) men legitimate their rapidly acquired power, tying a novel kind of socially awkward but

Read Online Rocket Billionaires Elon Musk Jeff

‘ visionary ’ masculinity to exotic forms of shareholding. Drawing on a ten million word digital concordance, the authors intervene in feminist debates on patriarchy, masculinity, and postfeminism, locating the power of the founders as emanating from a specifically racialised structure of oppression tied to imaginaries of the American frontier, the patriarchal household, and settler colonialism. This is an important interdisciplinary contribution suitable for researchers and students across Digital Media, Media and Communication, and Gender and Cultural Studies.

“ That this story is still unfolding makes it especially exciting to read. These men are still in their workshops, tinkering their way into orbit. ” —David Gelles, FORBES
On June 21, 2004, SpaceShipOne, built by aircraft designer Burt Rutan, entered

space and ushered in the commercial space age. Investment capital began to pour into the new commercial spaceflight industry. Richard Branson ' s VirginGalactic plans to ferry space tourists out of the atmosphere. Las Vegas hotelier Robert Bigelow is developing the world ' s first commercial space station (i.e., space hotel). These space entrepreneurs, including Microsoft cofounder Paul Allen and Amazon.com founder Jeff Bezos, now see space as the next big thing. In Rocketeers, Michael Belfiore goes behind the scenes of this nascent industry, capturing its wild-west, anything-goes flavor. Likening his research to “ hanging out in the Wright brothers ' barn, ” Belfiore offers an inspiring and entertaining look at the people who are not afraid to make their bold dreams a reality. “ The commercial space race is heating up so fast you need a cheat sheet

We're on the cusp of the new era in the great adventure of space exploration. More than a half-century ago, humanity first hurled objects into space, and almost 50 years ago, astronauts first walked on the moon. Since then, we have explored Earth's orbit with shuttles, capsules, and space stations; sent robots to Mars, Venus, Mercury, Jupiter, Saturn, and Uranus; sampled a comet; sent telescopes into orbit; and charted most of our own planet. What does the future hold? In *Space 2.0*, space historian Rod Pyle, in collaboration with the National Space Society, will give you an inside look at the next few decades of spaceflight and long-term plans for exploration, utilization, and settlement. No longer the exclusive domain of government entities such as NASA and other national agencies, space exploration is rapidly becoming privatized, with entrepreneurial startups building huge

rocket boosters, satellites, rocket engines, asteroid probes, prospecting craft, and even commercial lunar cargo landers to open this new frontier. Research into ever more sophisticated propulsion and life support systems will soon enable the journey to Mars and destinations deeper in our solar system. As these technologies continue to move forward, there are virtually no limits to human spaceflight and robotic exploration. While the world has waited since the Apollo lunar program for the next "giant leap," these critical innovations, most of which are within our grasp with today's technology, will change the way we live, both in space and on Earth. A new space age—and with it, a new age of peace and prosperity on Earth, and settlement beyond our planet—can be ours. Speaking with key leaders of the latest space programs and innovations, Pyle shares the excitement and promise of

supporting cast of equally fascinating entrepreneurs, from the irrepressible British mogul Richard Branson to the satellite internet visionary Greg Wyler. Tim Fernholz ' s fly-on-the-wall reporting captures an industry in the midst of disruption. NASA seeks to preserve its ambitious space program, traditional aerospace firms like Boeing and Lockheed Martin scramble to adapt to new competitors, lobbyists tussle over public funds, and lawmakers try to prevent this new space race from sparking global conflict. Fernholz spins this high-stakes marathon into a riveting tale of rivalry and survival.

There are hidden laws at work in every aspect of your business. Understand them, and you can create extraordinary growth. Ignore them, and you run the risk of becoming another statistic. It's become

Read Online Rocket Billionaires Elon Musk Jeff Bezos and The New Space Race

almost cliché: 8 out of every 10 new ventures fail. Of the ones that succeed, how many truly thrive-for the long run? And of those that thrive, how many continually overcome their growth hurdles ... and ultimately scale, with meaning, purpose, and profitability? The answer, sadly, is not many. Author Lex Sisney is on a mission to change that picture. After more than a decade spent leading and coaching high-growth technology companies, Lex discovered that the companies that thrive do so in accordance with 6 Laws - universal principles that govern the success or failure of every individual, team, and organization.
