Swirling mystery permeates Sea of Trees as Bill, an American college student, and his Japanese girlfriend Junko traverse the Aokigahara Forest in Japan-infamous as one of the world's top suicide destinations-in search of evidence of Junko's sister Izumi who disappeared there a year previous. As the two follow clues and journey deeper into the woods amid the eerily quiet and hauntingly beautiful landscape-bypassing tokens and remains of the departed, suicide notes tacked to trees and shrines put up by forlorn loved ones-they'll depend on one another in ways they never had to before, testing the very fabric of their relationship. And, as daylight quickly escapes them and they find themselves lost in the dark veil of night, Bill discovers a truth Junko has hidden deep within her-a truth that will change them both forever.

Fiction. 1863. New Mexico Territory. Shot full of holes and on the run from the relentless pursuit of his one-time friend now intent on retribution, Confederate deserter Everett Root finds himself navigating the brutal desert headed to the town of Mesilla, where he believes salvation lies. But when Everett stumbles on a cache of silver, and a young girl who's lost everything, he is forced to take stock of his past and his future. Full of sprawling landscapes and wild gunmen, Mesilla is a story of one man's resolve to rectify the wrongs he has committed and make peace with his place in the world.

Alli-Kar, a white-hole portal from another universe, rains meteoroids onto the surface of the planet Kelanni. But the so-called "lodestones" behave according to different physical laws, transforming Kelanni's society. With the aid of the fearsome Keltar in their flying cloaks, the Kelanni are being put to forced labor to mine the lodestones. Shann, an orphan with a fiery disposition, witnesses a battle between a Keltar and a stranger bearing a similar flying cloak. She tracks down the stranger, learning of the technology behind the Keltars' power and joining him on a mission to free the slaves and cut off their supply of lodestones. Meanwhile Karis, a Keltar, is sent on a mission to track down the rebels. She is attacked by a flying creature and saved by the enigmatic Chandara. At their Great Tree, she learns that a mysterious "Prophet" is out to destroy the Kelanni people. Their only hope is a powerful instrument hidden in the distant past. Pursued by Keltar, the party will encounter bizarre creatures, ancient technologies and terrifying dangers. Finally, they must seek to cross a massive storm barrier in order to reach the other side of their world, where a world-shaking revelation awaits.

What is there is only a limited amount of sanity in the world and the real reason people go mad is because somebody has to? What if a mysterious tribe in the Amazon rainforest turn out to be the most boring people on earth? What if the afterlife is nothing more than a London suburb, where the dead get new flats, new jobs, and their own telephone directory? These are the sort of truths that emerge in this collection of stories by one of England's most gifted writers. In The Quantity Theory of Insanity, Will Self tips over the banal surfaces of everyday existence to uncover the hideous, the hilarious, and the bizarre. Psychiatry, anthropology, theology—and literature—will never be the same.
