Simple Machines Study Guide. STUDY. PLAY. A _____ is 2 inclined planes that come to a point to make lifting or splitting easier. wedge. A _____ is a bar that pivots around a fulcrum. lever. A _____ is an object that spirals around itself. It is often used to hold things together.

~~Simple Machines Study Guide Flashcards | Quizlet~~

3.) Do simple machines make less work? Explain. No. Simple machines make work easier, they do not decrease the amount of work. Simple machines can actually make more work due to friction. 4.) What do we mean when we say "machines make work easier?" (force vs. distance) Simple machines make work easier to do by decreasing the force required by increasing the distance over which the work is done.
