History teaches that there are a succession of 500-year "Deltas," relatively flat planes followed by precipitous change. We are leaving one of those deltas and entering the next one, even as we cross over into a succeeding millenium. We are entering an age of possibility - really of infinite possibility. Yesterday, although a memory, is dead.

In the tradition of Alvin Toffler's Future Shock and John Naisbitt's Megatrends, The 500-Year Delta offers an enthralling glimpse of what businesses and individuals should expect as the five-hundred-year-old "Age of Reason" segues into the "Age of Possibility." According to visionary futurists Jim Taylor and Watts Wacker, we stand at not one but several crossroads-marked points of discontinuity between past and present. These include: The shift from reason-based to chaos-based logic The splintering of social, political, and economic organization The collapse of producer-controlled consumer markets For a world caught in this swirling intersection of change, Jim Taylor and Watts Wacker provide tested strategies to help companies and individuals reset their course toward an unpredictable future, offering new models to accommodate the increasing chaos of everyday life. Describing our present point of transformation as a "triple witching hour," the authors chart a future course that is at once bracing, forbidding, joyous, and ultimately redemptive.

extraordinary book that has become a worldwide best seller, provides tested strategies to help companies and individuals reset their course to accommodate the increasing chaos of everyday life. Jim Taylor and Watts Wacker make some startling predictions about a world caught in this swirling intersection of change.

What Happens After What Comes Next (first published as The 500 Year Delta), an extraordinary book that has become a worldwide best seller, provides tested strategies to help companies and individuals reset their course to accommodate the increasing chaos of everyday life. Jim Taylor and Watts Wacker make some startling predictions about a world caught in this swirling intersection of change.

Argues that we are approaching a time of great change that will dramatically alter our political, social, economic, and cultural organization

The authors of The 500 Year Delta chart a method for readers to create a personal course for the future, based on a series of paradoxes that exist in modern business. Reprint. 25,000 first printing.

In The 500 Year Delta, Watts Wacker and Jim Taylor astounded readers with their sweeping vision of time and change. Now they proclaim the Age of the Individual – a world where life has never been more difficult, because it has never been easier. Today, individuals have far more power to claim their own futures than ever before, which means they have to follow four major rules to chart their courses: know who you are; know where you want to go; recognise your own seminal moments; and adopt an attitude of insurgency. As these rules are applied to organisations, they too can master the nine paradoxes that abound in everyday life and watch productivity go through the roof.

This unique text presents the environmental history of the lowland delta of the rivers Rhine and Meuse. It is an ecological story of evolving human-environmental relations and how they cope with climate change and sea-level rise. The text offers a combination of in-depth ecology and environmental history. The synthesis presents a blueprint for future management and restoration, from progressive reclamation of land in the past, to adaptation of human needs to the forces of nature.

This book is a printed edition of the Special Issue "Resilience and Sustainability of the Mississippi River Delta as a Coupled Natural-Human System" that was published in Water

In The Deviant's Advantage, Ryan Mathews and Watts Wacker demonstrate how ideas create increasingly profitable markets as they move from The Fringe, to the Edge, to the Realm of the Cool, to the Next Big Thing, to Social Convention. The book tracks the products and people haunting the fringes of sex, science, art, language, faith, war and marketing, branding and macro-economics. Tomorrow's commercial success is an obsession in the mind of today's deviant. Las Vegas is a perfect example: it morphed from a bus stop in the desert to a neon 'Sin City' and finally into a family vacation destination. In 1945 a handsome, murderous sociopath called Benny 'Bugsy' Siegel decided to build a luxury gambling oasis in the desert. At the time, Las Vegas was a crossroads in the middle of the desert. Siegel understood the emerging desire for escape in the American psyche - and out of nothing, created what became an enormous gambling haven. Las Vegas has now transformed itself into a gigantic family-

oriented theme park, albeit one with slots and roulette wheels. It's become a holiday destination for the entire family, not just a place that fathers sneak off to. Las Vegas moved from the Fringe (Bugsy's original vision), to the Edge (the first hotel), to the Realm of the Cool (where everyone wanted to go), to the Next Big Thing (where everyone went), to Social Convention.
