Genius is not just about intelligence and aptitude, it's also a word that embodies our inner soul, nature, or character. In this illuminating book, a former principal and father shares heartwarming stories and wise advice that offers a rare insight into children and the process of education. The Genius in Every Child celebrates the moments in the lives of children, their parents, and their teachers. The stories of unique characters in action illustrate some of the principles of education and the disciplines we need to be good stewards of our children's character and intellect. The vignettes provide both delight and enjoyment in the miracle of it all, and perspective and solace in the difficulty of it all, encouraging parents and teachers to work hand-in-hand. This book urges parents to focus on the long run, entrusting the trials, struggles, and sufferings of the short run to the kids. It proposes a shift in focus from test scores to enthusiasm, from perfect behavior to learning

from mistakes, from measuring up to making something of yourself, from independence to interdependence, from goodness to integrity, from fear to love. The value of this experience to hundreds of children, parents, and teachers derives from the depth of Rick Ackerly's perception and the subtlety of his understanding. He offers perspective and guidance on a wide range of challenges faced by parents of today's school-aged children, including: self-confidence, discipline, boundary-setting, building character, integrity, taking responsibility, facing challenges, handling disappointment, peer pressure, reading, testing, homework, academic achievement, failure, and success. [Excerpt] Mr. Rick's Words of Wisdom Children need teachers at school and parents at home. Failure is at least as powerful an educator as success. Kids need consequences and they need forgiveness We put our kids at risk by trying to engineer their success. Our children need us to have confidence in them. The core of building character is taking responsibility. If we are open to the surprise, we can let them educate us.

Shares insights and wisdom about childhood education, focusing on the character and intellect-building aspects of learning.

Presents advice for parents coping with child rearing issues, including first day of school, discipline, separation from parents, peer pressure, dyslexia, and more.

How to Unlock Your Child's Genius is a book for parents and educators that shows them 11 simple steps on how to help support their child's learning. This is the perfect guide for parents who want their children to be Smart, Successful, Nice and Happy! This book is LOADED with simple steps any parent can take to help their kids reach their full potential! Smart - Every child is a genius in their own way... some are book-smart, some are street-smart, others are relationship-smart. This book shows how to help your child reach their full potential in school and in life! Successful - Being smart is only half the battle... you also need to know how to achieve success. This book will show you the two most important skills your child must have to achieve success throughout life! Nice - One of the hardest things to do in life is to be right and not hurt others with the fact that you are correct. It is rare that a child is both really smart and really nice, but there are two things you can teach your child to make this possible. Happy - Being smart, successful and nice will only matter if your child end up being happy. Our greatest wish for any of our children is that they would live a happy life, and this book will show you the four areas to develop in your child if you want happiness in their future. Along with great information, this book contains dozens of activities you can do with your children each day to help them become smart, successful, nice and happy! Pat Quinn has spent his entire career helping parents and teachers change the lives of children they know and love. Leave a lasting and positive impact on the next generation with this groundbreaking book!

Wishing your child will one day establish a rewarding career is every parent's hope. Taking steps to accelerate and aim your child's academic performance in a highly rewarding direction is uncommon. Our world has already changed in ways that negate traditional approaches to college and career pursuits. A child's often whimsical interests may not play well in an economy that is

demanding, specific, and globally competitive. This book focuses on preparing children for a globally competitive economy wherein specific disciplines are highly rewarded. Helping prepare children for options in tomorrow's world is the key objective. With a little effort, guidance, and assistance on your part, life options for your child can be dramatically improved. Raising Genius is an intentional misnomer. Many might dismiss your child's academic and career success as the result of having a genius IQ, but this is not usually the case. Often what we see as "genius" is the result of focused and applied work over time. In Raising Genius, the author provides methods, guidance, and strategy to help parents set their children up for academic and career success ... success that will enhance options for your child.

Give children the best possible start with techniques to aid their ability to speak, count, write, solve problems, and progress well at school. Let educational expert Ken Adams teach you how to support your child's learning with practical exercises, fun activities and ideas for interactive play.

We all want our child to be the best they can be, but how can we discover and encourage their natural talents? Clinical psychologist Andrew Fuller believes that every child has an innate sense of inquisitiveness, creativity and lateral thinking that forms the basis of genius. However, social conditioning and school life can lead to a desire to conform and fit in which can squash their curiosity. For parents and grandparents, Andrew Fuller's new book holds the way to unlock their child's genius. No the answer is not homework, more after school tutoring or blaming the school. Yes the answer is thinking, talking and listening, and delightfully making mistakes together. Covering the age range of 2 to 18, Andrew draws on the latest research and his own extensive work with thousands of children in private practice. He shows parents how to recognise the qualities in their child that predict genius â€

creativity, motivation, determination, imagination and the willingness to explore and build on these essential foundations regardless of which field their talents lie in.

Advises how children can achieve full potential through at-home activities and offers suggestions for expanding a child's natural and often unrecognized ability.
