Industrial Minerals and Gemstones Surveys have shown that Greenland has abundant gemstone resources. These include deposits of diamond, quartz, lapis lazuli, ruby, peridot, topaz, sapphire, tugtupite, and amazinite. Most of the ruby and sapphire deposits are found on the southwest coast near the village of Fiskenaeset/Qegertarsuaiaat.

Greenland Mining, Minerals, and Fuel Resources

There are many more isolated sites on Greenland that have produced their own unique minerals. Gold and platinum have been found as well as diamond bearing kimberlites. Some localities have produced many unusual native metals such as antimony , bismuth , tin , iron and lead .

As at June 2019, Greenland Minerals had cash of AU\$4.7m and no debt. In the last year, its cash burn was AU\$5.1m. Therefore, from June 2019 it had roughly 11 months of cash runway. To be frank, this kind of short runway puts us on edge, as it indicates the company must reduce its cash burn significantly, or else raise cash imminently.
