Modern Losing Trick Count. If you want to bid accurately and achieve greatly improved results at the bridge table, you have to master the Losing Trick Count. It is a tried and tested method of hand evaluation which has stood the test of time.

Modern Losing Trick Count by Ron
Klinger - Goodreads

History. The origins of the Losing Trick Count (LTC) without that name can be traced back at least to 1910 in Joseph Bowne Elwell's book *Elwell on Auction Bridge* wherein he sets out, in tabular form, a scheme for counting losers in trump contracts similar to the basic counting method given below.. The term "Losing Trick Count" was originally put forward by the American F. Dudley Courtenay ...

-12 points and no special shape, expect 8 losers.

Losing Trick Count - Palo Alto Bridge
Losing Trick Count - A hand evaluation technique originally described by F. Dudley Courtenay's book "The System the Experts Play", and popularized by Ron Klinger in his book "Modern Losing Trick Count", based on counting effective losers in a trump contract. Simply stated, once partnership has identified a 8+ card suit fit (unless the opener has a very strong-long major, e.g., a "self-sustaining suit"), each suit may be evaluated as containing between 0 to 3 losers:

LOSING TRICK COUNT (Developed by F. Dudley Courtenay, popularised by Maurice Harrison-Gray during 1930s) The Losing Trick Count used in conjunction with the standard point count, is a method of evaluating the trick taking potential of two combined hands playing in a suit contract. It primarily quantifies the "shape" of the hand, and is merely a different but more formal way of adding points for length, singletons, or voids.

LOSING TRICK COUNT - BridgeWebs
Singleton suit : Count one loser, except for ace singleton (0). Doubleton suit : Count two losers except for A-K (0), A-x (1) or K-x (1). Count Q-x as 2 losers. 3-card or longer suit : Count three losers but deduct one for the

determining the optimum level for a makeable suit contract based upon a Partnership's combined holdings.

LOSING TRICK COUNT -

fourseasonsbridge.com

Losing Trick Count (LTC) is a hand evaluation method popularized by Australian expert Ron Klinger. It's used to judge how high to bid after an 8+ card trump fit is identified. LTC employs the following math: Count the number of "winners" and "losers" in each of your suits: Each ace and king counts as a winner.

Losing Trick Count in Bridge Hand Evaluation and Bidding

1) In a trump contract, always count the trump suit. The best method is not

East has 2 spade losers, 2 in hearts, 1
in diamonds and 2 in clubs which is
also a total of 7 losers. A normal
opening bid has 7 losers, which is the
LTC for the West hand, and which
East should generally expect as a
minimum. East should presume a total
between the two hands of no more
than 14.

LOSING TRICK COUNT - BridgeWebs

With only two cards, the queen becomes a loser (but count AQ as no losers and KQ as one loser). With only one card, just the A is not a loser. So Qx is two losers the same as xx but Kx is one loser as is the king or queen alone. Remember these are not real losers, just LTC losers as a form of hand evaluation.
